Education

Vellore Institute of Technology, Vellore

July 2021 – June 2025

Bachelor of Technology in Electronics and Communication

CGPA - 8.57

Relevant Coursework: **Data Structures and Algorithms, Object Oriented Programming, DBMS**

Experience

Sypsys Technologies private limited

July 2025 – Present

Backend Developer

Onsite

- Developed scalable backend applications using **Node.js** and **Express.js**, building RESTful APIs to support web and mobile platforms.
- Designed and optimized **MongoDB/ MySQL** database , improving query performance and reducing API response time.
- Deployed and maintained applications on **AWS/VPS**, ensuring high availability, logging, and performance monitoring.

Projects

WanderLust | *MERN, MongoDB (Mongoose), Passport.js*

[Live Site](#)

- Built a full-stack app with Node.js, Express.js, and MongoDB enabling **CRUD operations on 100+ property listings**.
- Implemented secure authentication with **Passport.js** and interactive maps using **Mapbox**, enabling location-based filtering and real-time feedback with connect-flash.
- Developed fully **RESTful routes**, mobile-responsive UI using **Bootstrap v5**, and deployed the app on **Render**, ensuring smooth property management and user experience

Realtime Chat App | *MERN Stack, Socket.IO, TailwindCSS, Zustand, JWT*

[Live Site](#)

- Formulated a high-performance **real-time chat application** using **Socket.IO** over **WebSockets** enabling **instant messaging, multi-room communication**, and **live presence tracking** for seamless user interaction
- Leveraged **event-driven architecture** with **Kafka** for **scalable message streaming**, integrated **Redis** for **low-latency caching**, and used **PostgreSQL** with **Prisma ORM** for reliable data storage
- Executed secure **OAuth 2.0 authentication** via **NextAuth.js** with **role-based access control**, **JWT-based session handling**, and middleware-driven **authorization workflows** to ensure robust group-level security

Zerodha Trading Platform | *MERN Stack, Bootstrap, Material UI, Chart.js*

[Live Site](#)

- Built a full-stack trading web app using the MERN stack, replicating core Zerodha features and handling **100+ mock transactions across buy/sell** , wishlist, and holdings modules.
- Engineered a responsive dashboard UI using **Bootstrap v5** and Material UI, ensuring cross-browser compatibility and reducing front-end related support **tickets by 35 percent**.
- Designed account-based **authentication** for **20+ test users**, and a mock trading experience with order history tracking and real-time UI feedback.

Achievements

- **Cloud Computing– NPTEL:** Navigate and manage cloud environments effectively.
- Solved **300+ DSA** problems: LeetCode, CodeChef, CodeForces, and GFG

Skills

Languages: C++, C, JavaScript, TypeScript, SQL

Technologies: NextJS, NodeJS, ExpressJS, Bootstrap, EJS, MongoDB, MySQL

Libraries: ReactJS, Redux Toolkit, Material UI, Tailwind-CSS, React Router, Context-API

Dev Tools: Git, Github, Gitbash, VS Code, Postman, Vercel, Docker

Soft Skills: Leadership, Team Management, Creativity, Public Speaking
